

Turn-Assist 270

Brand: Okuma Australia

Short Description

Turn-Assist 270 can be equipped with a robot that can lift 20kg, 35kg or even more.

Description

Turn-Assist 270

- Small and medium sized runs
- Workpieces up to Ø 270 mm
- Powered table with more capacity
- Robot payload: 20 kg, 35 kg or more
- Two models available, Integrated "Turn-Assist 270i" (portable) or Separated "Turn-Assist 270s"

If you want more: Then choose the Turn-Assist 270, RoboJob's most powerful model in the Turn-Assist Series. This standard automation unit is equipped with powered feed and removal. Since the Turn-Assist 270 is even larger than the Turn-Assist 200, you can get even more out of it. This not only applies to the number of workpieces, but also to the size of your workpieces. You can automate workpieces up to a diameter of 270 mm on this model.

CAPACITY

RoboJob's unique patented stacking principle gives you a surprising amount of capacity. The Turn-Assist 200 and 270 are equipped with powered feed and removal, allowing you to stack even more workpieces.

With the Turn-Assist 270 you can choose from more than 4 different models:

Turn-Assist 270 i 20: removable and/or movable with a payload of 20kg

Turn-Assist 270 i 35: removable and/or movable with a payload of 35kg

Turn-Assist 270 s 20: separated, with a payload of 20kg

Turn-Assist 270 s 35 or more: separated, with a payload of 35kg or more
