Description

The Okuma LAW-FII is a 2-axis turning machine that occupies little space but delivers big results. Our fast turret index reduces cycle time, letting you produce more wheels more quickly. The simplified X- and Z-axis configuration accommodates wheels up to 20 inches and places a premium on efficient use of space. With its narrow footprint and higher speeds the LAW-F creates a cost-effective, space-saving machine that fits in most any wheel production line.
