### Description

Building on the MB-V foundation, the MF-46V offers the added benefit of an automatic pallet changer (APC). The fast APC improves the versatility of the machine while maintaining accuracy and productivity. In addition, the MF-46V is available with integral hydraulic clamping capability to maximize part clamping speed and versatility. When space is at a premium, the MF-46V is an efficient choice. Designed for close proximity to neighboring machines, it is maintenance-free on both sides. Furthermore, it can be easily adapted to loader and robot systems for increased product throughput. A unique combination of high thermal stability, compact design and optimum speed, the MF-46V is in a class by itself.
